

DRONES

HOW DRONES FUNCTIONS

- We need:
 - Controller
 - Drone
 - Educated man who knows how to fly drone

CONTROLLER

This joystick is used for moving drone „up” and „down” but also for turning it around itself

This joystick is used for moving drone „forward”, „backward”, „left” and „right”

DRONE

DRONE TECHNOLOGY

Positive:

- Wide range of usage
- Still in developer stage
- Easy to use
- More possibilities
- Wide range of products

Negative:

- invading privacy
- disturbing planes in the sky

Usage:

- In delivering staff from online stores
- Delivering mail from post office
- Discovering new places
- Photography and videography
