

# Fourth day

We started our day at 9AM in the hotel Grgin Dol. The Croatian teacher explained to us the treasure hunt game in Požega. We split into 3 teams and started searching for the treasure. After we found everything we went to get some coffee, and came back to school. At 11:30AM Filip had his Drone presentation and he showed us how to fly drones. At 1PM we had lunch in the school restaurant. Next on the list was Sports activities. We played volleyball and basketball, later we switched to football. After that we should have gone to Pleternica but the trip was canceled so we had 4hrs of free time. At 7PM we had dinner at Mama Mia. We ate pizza and had a really good time.

## What we learned

The skills I learned this week are many. I learned to communicate with young people from different countries, control a drone, create timelines, and above all to work as a group among us. - Alessio

We learned things about internet security, the history of Požega and learned things about mechanical engineering. -Berk

This week we learned to use the Internet safer, pilot the drones, use timelapse, and most important of all to communicate with others. -Luka

We learned about Požega culture, how to make timelapse videos and how to draw a drone. -Kadri

The experiences gained these days have been so many, from visiting new places to piloting drones. I would like to thank everyone. - Antonio
