

I enjoyed the second day of Slovenia I enjoyed the activities so much.
The workshops about mountain rescue operations were interesting.
The nature is so relaxing, since we arrived at the cabin my stress level rapidly decreased.
The scenery at viewpoint Bled was mesmerizing.

By virtue of the experiments that we have conducted today, I believe all of us, and me, of course, have learnt the unleashing power of senses, excluding vision, and thanks to the presentation of the day, I have learnt about how people are being saved by mountain rescue teams, the adrenaline they experience and the tools that are used during the process. I have so much fun as we have learnt those things while chatting, sharing cultural aspects and more.

I felt exciting and happy. I learnt a lot of things.

First of all I tried difficult things and I have a lot of experiences. When I come to mountain I said "climbing is very hard" But now my think is changing. I thought the mountain is very high but not. I like hotels. We came to Slovenia very relax. I like all activities!

We came to Slovenia by bus, then arrived at Hotel Kvek, We ate at McDonald's and met up with Slovenian and Estonian team because they are my favourites. We played with the ball and hanged out, it was really enjoyable.

03.06.2022.

We went to the school and spoke to other teams. It was amazing to ~~see~~ see them again because I know them from other Mobilities. Later we claimed the Apps, this was a skill I never knew I will get. We arrived at Zelenica and got a room with Estonian boys :).

04.06.2022.

Today we learned about mountain rescue teams in Slovenia, and learned how to use mountain maps and how to be conscious of our environments. We also hiked through the mountains. Throughout this adventure I have flown my drone and learned some new manovers in the air. Amazing!

This is very beautiful place to live. I am having a great time making new friends and learning ~~new~~ new languages. The views when hiking are so beautiful. Everybody is so nice, its fun ~~to~~ learning about new culture and get to experience it yourself. The workshops have been fun so far.

1. day in Slovenia

We arrived at Ljubljana and on the way to hotel we already saw that it was one small but rich/beautiful town.

2. day in Zelenica

We climbed up the mountain which was exhausting, but beautiful nature, something that I never saw before.

3. 2. day in Zelenica

I realised that I can live and have fun completely without phone. It just makes you bond more with people which is good.

Josip Jatić, Croatia

For me in Slovenia is very nice. I like hotel and food in it. We founded a new friends from Estonia. ~~I think~~ I think ~~it's~~ it's ~~good~~ good because we learn how to communicate with others. The ~~best~~ ~~part~~ part of it is hanging out ~~with~~ with friends, climbing and when we was blind walking with rope. ~~On the mountain is very beautiful~~
We found out how it is to live in nature and eat mountain ~~food~~ food.

This weekend was the best weekend because I meet ~~the~~ people from other countrys ~~and~~ and we start to know each other more ^{and more} every day.

They helped me with my stuff...
They are the best people...

I think all the activities we have done helped us to get to know each ~~other~~ other better and it was beneficial for each and every country to share their culture with other teams.

And also we experienced a level of rescuing ~~operation~~ operation with a dog. In two days I really love Slovenia. The people of Slovenia are so nice, hospitable and amazing.

In the first day I've been in Slovenia i really loved the country.
Everything was perfect in the hotel like hoppitality, foods etc.

In the first workshop we were blindfolded and we were supposed to recognise the objects on the rope. It was kinda fun to play.

In the second workshop the dog was very sweet and smart. I learned a lot there. Tracking GPS was interesting. But I got it lost.

The Atmosphere in Mountain is awesome everything is perfect over this

We haven't been in Slovenia long time, but already I like to be here. The most impressing is nature, specially the hills. It was challenging to climb up to the mountain. But the other activities have been easy. The workshops were enjoyable. The most interesting for me was to ^{get} know about rescuing. 😊

It's good to be away my usual lifestyle. I mean in the mountains I am together more than 30 people, I can't socialize my family members because I don't have internet and also taking the shower is challengeing. here.

Still I have positive emotions. I really like every second here. And I am thankful for the weather. ☀️

Slovenia

Petra is the best. Everyone else ~~except~~ is slow as hell. Good views.
A lot of Red Bull. Not physically challenging

In the previous two days we have spent most of our time with the workshops. I believe all the activities we've done helped us to get to know each other better and it's beneficial for each and every country to share their culture with other teams.

During the time we spent at the mountain cabin we were presented how rescue teams are trained and how they manage to move as a total team in the event of an rescuing operation.

Also we experienced a basic level of rescuing operation with a dog. We learned about her breed, how she were trained and what should we do with a rescuing dog.

And last but not least I've witnessed the beautiful nature of Slovenia. The view and the weather is amazing. Also the people are definitely so nice and hospitable. I am so pleased to have met everybody.

So yesterday we went to Home on
Zelenica, we make a lot of new friends and
met a lot of new people. Today we had a
lot of free time and I like it because
we can spend it with people from Turkey, then
we went to one morning ~~to~~ & called Ben had izvirna
završnice and it was fun.

These few days in the mountain have been very interesting and enjoyable. These ~~are~~^{were} so many things I learned for example I learned how to use map and I learned so many things about the mountains and the mountain rescue team. In my opinion everyone should visit Postaja Zelenica because it's very beautiful and wonderful place. The landscape looks enormous and if you visit this place there is a chance you get to see Petra. Nik was very good ~~and~~ and I learned a lot of him on he taught us cool things about the mountain and entire Slovenia. The thing I like the most is that there is no signal and no internet. So you get best of your god damn phone.

I think a bobcat experience is not complete positive because it was hard for me
I am not used this activity, but I like the idea to be we european friends. The
activity is normal, beautiful but very isolated.

With the help of this project, I learned so many things that I will remember all life. First day, we went to Slovenia school and they prepared presentation which participate. We learned about how to survive in nature and relieve in stress. I've never been do camping. It's kinda a little bit stressfull but with the collaboration our friends I would be able to overcome all of this.

The second day of my Slovenia journey - I learnt about different food tastes, peaceful human with which I met. Italians, Slovenians, Croatians that I stay with the cabin. I felt excited about meeting people but I can handle it. We climb, we eat, we had a workshop and it was kind of funny I like it.

Kaer Aa Teer

In the second day of Slovenia journey, we were in the cabin. So I got chance to know different people from different countries. It was a great opportunity because I talked to people who are able to speak English. So I improved my English level and learnt not to be shy talking to people I don't know. I made some friends here and I talked to them.
